

# AHEMAD SHAIKH

SAP ABAP Developer | ABAP Cloud Certified (100%)

Pune, Maharashtra | +91 721 9855 830 | [shaikh.ahemad@hotmail.com](mailto:shaikh.ahemad@hotmail.com)

[LinkedIn](#) | [Github](#)

## PROFILE SUMMARY

SAP Certified ABAP Developer (100% score) with hands-on project experience across full WRICEF development, OOP ABAP design patterns, and the RAP model. Built a complete Inventory Management System showcasing DAO architecture, BAdI extension layers, CL\_SALV\_TABLE ALV reports, and CDS-driven Fiori integration. Proficient in ABAP Cloud / BTP development and Clean Core principles. Seeking an entry-level SAP ABAP role to contribute to enterprise teams in a structured, mentored environment.

## SKILLS

|                                                                                                                     |                                                                                              |
|---------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------|
| <b>Core ABAP:</b> Workbench, DDIC, Function Modules, Subroutines, Module Pool (Dialog Programming), Screen Personas | <b>OOP &amp; Patterns:</b> OO ABAP, Factory, DAO, Dependency Injection, ABAP Unit (TDD), ATC |
| <b>WRICEF:</b> ALV Reports, BDC, BAPI Upload Programs, SmartForms, Adobe Forms (SFP), Workflow                      | <b>Enhancements:</b> BAdIs, User Exits, Clean Core Tier 1/2                                  |
| <b>RAP &amp; Cloud:</b> CDS View Entities, Behavior Definitions, Draft Lifecycle, DCL, AMDP, OData V4               | <b>Tools:</b> ADT (Eclipse), SAP GUI, BAS, BTP, VS Code, Git, GitHub, abapGit, Postman       |

## CERTIFICATIONS

**SAP Certified — Back-End Developer, ABAP Cloud | Score: 100%** *May 2026 – May 2027*

Validates mastery of ABAP programming, RAP model development, and Clean Core principles for SAP S/4HANA custom extensions. | C\_ABAPD\_2601

## EXPERIENCE

**SAP ABAP Developer — Technical Training**

*Jan 2026 – May 2026*

**Delphi Computech Pvt Ltd**, Pune

- Built 100+ ABAP programs spanning Reports, BDC/BAPI upload scenarios, Function Modules, and automated SmartForms for manufacturing and logistics use cases.
- Developed dialog-based screen programs using Module Pool Programming, including a standalone screen-navigation calculator.
- Optimized Open SQL queries and refactored legacy selection logic using CDS View Entities with push-down logic.
- Built and exposed RAP Business Objects as OData V4 services; tested full CRUD lifecycle using SAP Fiori and Postman.
- Designed CDS View Entities with associations, access controls (DCL), and extensions for analytical reporting views.

- Implemented multi-class OOP hierarchies using Factory and DAO patterns; wrote ABAP Unit test classes for business logic validation.

## PROJECTS

---

### Inventory Management System (IMS) — Core & RESTful API

SAP ABAP (OO), CDS, RAP (Unmanaged), CL\_SALV\_TABLE, BAdI, Adobe Forms (SFP)

- Designed a centralized DAO class (ZCL\_INV\_DAO) with OO-ABAP for CRUD operations, automated audit logging, pessimistic DB locking, and role-based authority checks.
- Built a custom BAdI extension layer (ZIF\_INV\_BADI) to separate business validation logic from the DAO core, enabling plug-in dynamic validations without modifying base classes.
- Wrapped BAPI\_GOODSMVT\_CREATE in a service class (ZCL\_INV\_BAPI) and created a function module (ZFM\_INV\_VALIDATE\_STOCK) for reusable stock validation.
- Integrated backend data with Fiori frontend using CDS Interface Views and an Unmanaged RAP Behavior Definition; mapped web transactional requests to DAO via RAP Behavior Implementation classes.
- Built a fullscreen OO ALV report (CL\_SALV\_TABLE) with custom toolbar, hotspot event handling, and POPUP\_GET\_VALUES for real-time stock quantity updates.
- Configured SAP Interactive Forms (Adobe Forms/SFP) with ABAP Dictionary interface and created a spool-driven batch program for dynamic PDF stock label printing.

### SoSubmit — Desktop Data Management Suite

Python, CustomTkinter, SQLite, Pandas, Matplotlib, PyInstaller [Link: github/shaikhahemad/SoSubmit](https://github.com/shaikhahemad/SoSubmit) (Open Source)

- Created an offline-first desktop application for relational SQLite database management with dynamic form generation and parameterized query execution.
- Implemented type validation, parameterized SQL queries for injection prevention, and Pandas + Matplotlib for in-app data analysis and charting.
- Integrated OpenPyXL for automated Excel report generation; managed full software lifecycle including packaging as a standalone Windows executable (PyInstaller + Inno Setup).

## EDUCATION

---

### Bachelor of Science (BSc) — Computer Science, Electronics & Physics

2021 – 2024

Swami Ramanand Teerth Marathwada University (SRTMUN), Nanded, Maharashtra
